

DEPARTMENT OF THE NAVY LOCAL POPULATION ID CARD/BASE ACCESS PASS REGISTRATION

PRIVACY ACT STATEMENT:

AUTHORITY: 10 U.S.C. 5013, Secretary of the Navy; 10 U.S.C. 504, Headquarters Marine Corps Form OPNAVINST 5530.14E, Navy Physical Security, Marine Corps Order 5530 14A, Marine Corps Physical Security Program Manual; and E.O. 9397 (SSM) Amendment SORN Num 5512-2.

PURPOSE(S): To control physical access to Department of Defense (DoD) Depots, Installations, facilities, or areas over which DoD, DON, or U.S. Marine Corps has security responsibilities by recertifying or verifying an individual through the use of biometric databases and associated data processing/information services for designated populations for purposes of protecting U.S. (or allied government/national security areas of responsibility and information; to issue badges, replace lost badges, and retrieve passes upon separation from service; to maintain visitor statistics; collect information to adjudicate access to facility; and track the entry/exit times of personnel.

ROUTINE USE(S): To designated contractors, Federal agencies, and foreign governments for the purpose of granting Navy officials access to their facility.

DISCLOSURE: Providing registration information is voluntary. Failure to provide requested information may result in denial of access to benefits, privileges, and DoD installations, facilities and buildings.

IDENTITY PROOFING AND APPLICATION INFORMATION

1. LAST NAME:	2. FIRST NAME:	3. MIDDLE NAME:	4. NAME SUFFIX:
S		JR.	
5. HISPANIC OR LATINO (Check one): <input type="checkbox"/> YES <input type="checkbox"/> NO		6. RACE (Check one or more): <input type="checkbox"/> WHITE <input type="checkbox"/> AMERICAN AMERICAN <input type="checkbox"/> ASIAN <input type="checkbox"/> AMERICAN INDIAN OR ALASKAN NATIVE <input type="checkbox"/> NATIVE HAWAIIAN OR OTHER PACIFIC <input type="checkbox"/> OR OTHER PACIFIC ISLANDER	
7. GENDER (Check one): <input type="checkbox"/> MALE <input type="checkbox"/> FEMALE		8. DATE OF BIRTH:	
12. US CITIZEN (Check): <input type="checkbox"/> YES <input type="checkbox"/> NO		13. DUAL CITIZENSHIP: <input type="checkbox"/> YES <input type="checkbox"/> NO CITIZENSHIP OTHER THAN U.S. (Country):	
U.S. Citizen Minimum Documentation Required: By Birth - Social Security No and/or State ID/Drivers License. Naturalized - Certification Number, Petition Number, Date of Birth. State ID/Drivers License. Derived - Parent's certification number, Social Security No and/or State ID/Drivers License.			
Alien Minimum Documentation Required: Registration Number, Expiration date, Date of entry, Port of entry.			
14. IDENTITY SOURCE DOCUMENTS PRESENTED:	15. DOCUMENT NUMBER:	16. ISSUED BY STATE/COURT:	17. ISSUED BY COUNTRY:
<input type="checkbox"/> Social Security No.		United States	United States
<input type="checkbox"/> State ID/Drivers License			
<input type="checkbox"/> Passport No.			

Special Notice!

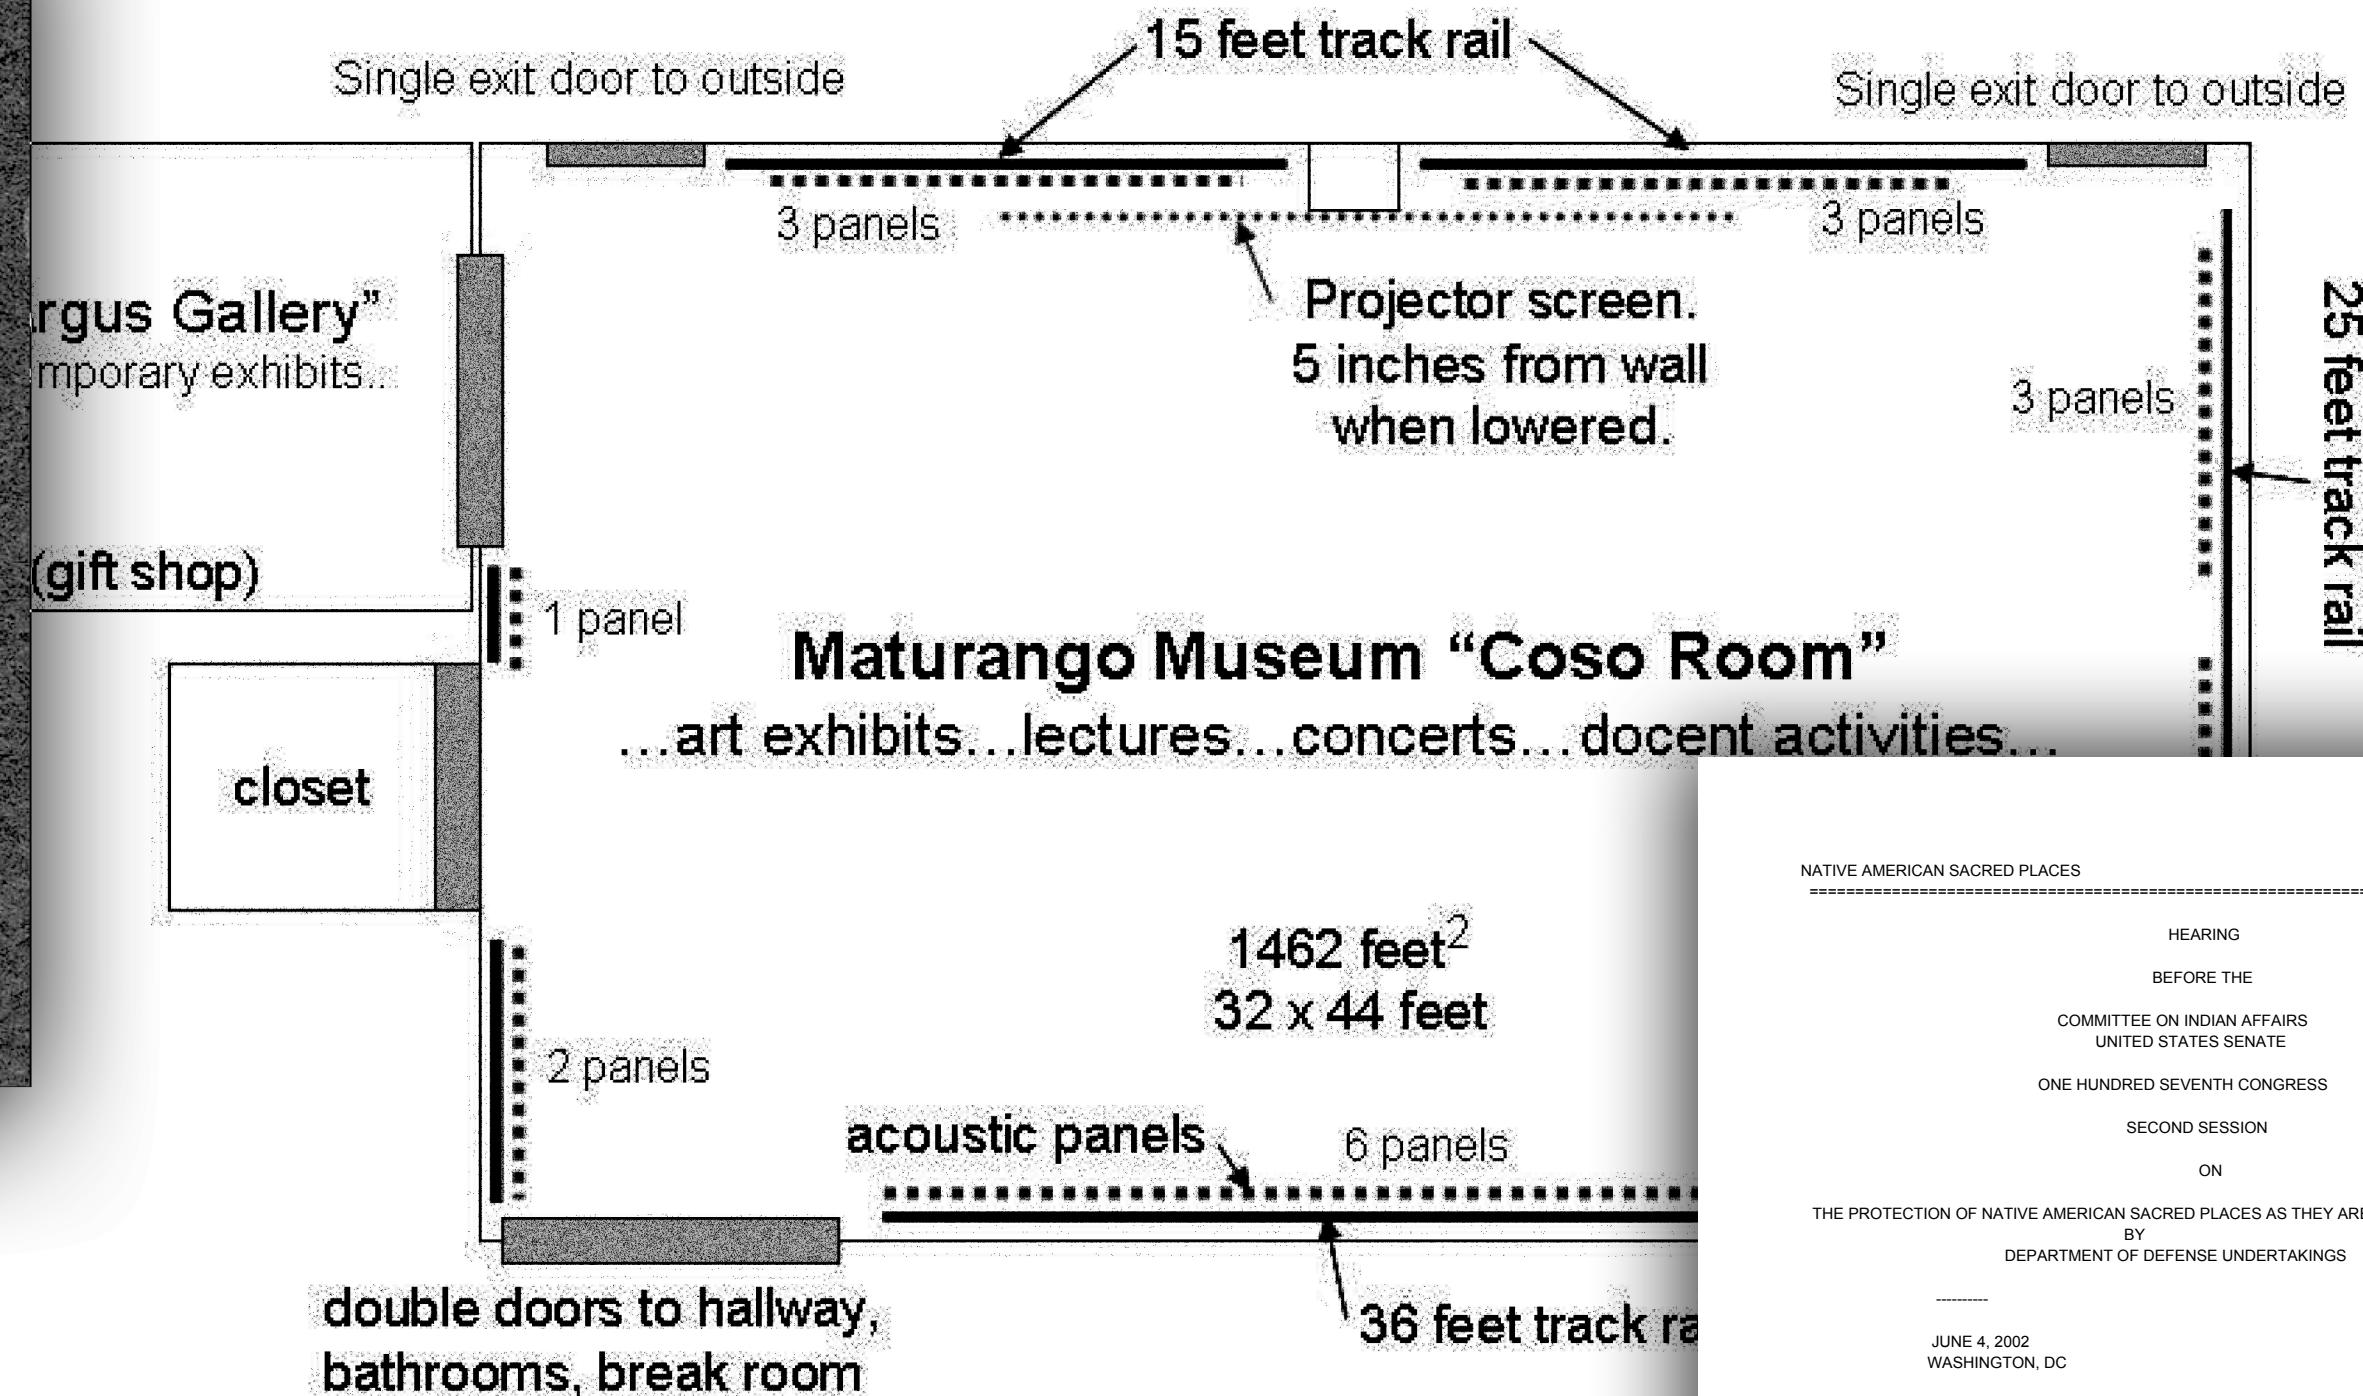

Due to an O.P.A. ruling which allows the management 93-100 of one-meat-point per person served in our dining room, and because of our geographical location and our inability to secure fish or fowl to substitute for meat we therefore will have to limit the number of hotel guests. As a consequence we suggest you write in advance for hotel accommodations.

Coso Hot Springs are 108 miles from the nearest source of supplies which is Lone Pine, Calif. All food must be brought from there by our truck each week, there is no other means of shipping.

Therefore if it is possible for you to do so we suggest you come prepared for housekeeping. The rates are in this folder elsewhere.

We could close the Hotel completely but this would deprive many sick people of the benefits of these springs who are practically unable to prepare their own foods, therefore the dining room will remain open to the extent of our ability to secure food.

VOLCANIC MINERAL WATER ANALYSIS	
Silica (SiO ₂)	458.0
Alumina (Al ₂ O ₃)	570.4
Iron Oxide (Fe ₂ O ₃)	13.6
Phosphate Anhydrite (P ₂ O ₅)	0.7
Boric Anhydrite (B ₂ O ₃)	0.0
Calcium Sulfate (CaSO ₄)	227.0
Magnesium Sulfate (MgSO ₄)	515.0
Potassium Sulfate (K ₂ SO ₄)	95.8
Sodium Sulfate (Na ₂ SO ₄)	2040.0
Sodium Chloride (NaCl)	5.8
Total Solids	8362.8
Sulfuric Acid (H ₂ SO ₄)	492.2
Permissible measured in terms of Potassium Permanganate (KMnO ₄)	5.5
	50.88 g/l

This diagram is not to scale. Walls are painted white, floor is sealed concrete style black with exposed ducting, medium gray, velcro-friendly, 4'x8' acoustic panels cover the wall space as indicated by Track rail is 10 feet high; chain and "hanging" heavy items. Light display items can be hung from nails inserted in velcro. 36 Pedestals (24" – 36" high, 12"x12", 16"x16") are available. LED lights highlight art objects.

STATEMENT OF RACHEL A. JOSEPH, CHAIRPERSON, LONE PINE PAUITE-SHOSHONE TRIBE, LONE PINE, CA

Ms. Joseph. Good morning, Mr. Chairman, Vice Chairman Campbell. I am Rachel Joseph, chairwoman of the Lone Pine Paiute-Shoshone Tribe in the Owens Valley located on the eastern side of the Sierras in central California.

I am very honored to be here this morning to testify on behalf of my tribe and the Shoshone-Paiute, including my parents, who have prayed, worshipped, and healed themselves at the Coso Hot Springs.

The Coso Hot Springs have been used by my people from time immemorial, and the healing power of the warm Coso water and mud is no longer the same. In 1947, the Department of Navy acquired the Coso Hot Springs through condemnation, and, because the area was believed to be rich in geothermal energy, plans were moved forward to tap this energy resource in the

Plate 18. This stone building, commonly referred to as the restaurant, seems to have served several functions and was probably, at one time, the focal point of the entire resort area. The building contains a kitchen a common room (which functioned as the dining area) with a large fireplace and a room with a counter which probably served as the store and post office. Another room located in the building may have been an office or employee quarters. Photo courtesy of Frasher's Desert Foto's.

Plate 17. This large, one-story stone building has 13 small guest rooms, a common bath and a large central hallway. The stone is unlike any found within the Coso Hot Springs Basin and is reputed to have come from about five miles to the west of the Springs (T. Barling, personal communication). The stone and workmanship in this building appear to be identical to that of the restaurant building. Both buildings are thought to have been built by Sanders and associates in the 1920's. Throughout the interviews conducted by Iroquois, references were made to the "castle" at Coso Hot Springs. On the basis of appearances only, these individuals were most likely referring to the hotel rather than the restaurant. This building (or its counterpart) was thought to have been a movie location site at one time.

Iroquois' research on Coso Hot Springs uncovered a rumor that Coso may have served as a movie set in the past. In April of 1961, Dr. Carl Austin of the Naval Weapons Center at China Lake found several crates of glass photographic plates at Dead End Cabin. The images on the plates represented a movie set consisting of "Arabic" style buildings being attacked by persons in Arab garb using ladders to reach the roofs. An unanswered question is whether the hotel and restaurant buildings at Coso was an old movie set or was built to emulate a particularly popular movie of that era.

For the record--and I have submitted a recent letter from our tribal attorney dated April 9 regarding to our efforts to have monitors on site at this test drilling--the mitigation measures require that the Navy facilitate the use of tribal monitors, which they have insisted they have no money to pay for, and it is important that the tribes have monitors, so we identified, submitted the names ahead of time as required.

The day that they showed up at the mandatory training, they had to wait almost an hour, and then the name tags that were provided had just on them "Indian." There was no name on their name tags, even though names had been provided weeks ahead of time.

In addition, after publication of the FONSI--Fact of No Significant Finding--they notified us on Friday that the testing would begin the following Monday. Our monitors showed up. They were advised that they were to stay on site for 10 hours 7 days a week and to be there for almost 3 weeks without leaving the facility. This, in fact, does not facilitate the kind of monitoring that needs to happen in sacred areas and at significant sites. We were also advised that the monitors could not go within 50 feet of the equipment that was doing the drilling, which, for those of us that have an understanding of the work of monitors know they need to be close enough to observe, as the earth is being moved and there's activity, to see if, in fact, they are uncovering or moving artifacts or religious objects in the area.

We thank you for the opportunity to testify today and hope that we can receive assistance to ensure that the area is restored so that our people can use the area as they formerly used it, which includes immersing themselves in the water and the mud that was so necessary to the healing and the practice that we have engaged in for decades there.

We believe that the Navy needs to be more responsive and considerate and sensitive to the fact that this is sacred area, and not to treat us as a deterrent to them moving forward with whatever their goals may be.

Thank you again for the opportunity. We certainly would support any effort to introduce legislation that would we think, refocus some of these Federal agencies on the area that they need to address.

Thank you for your time.
